About us ...

Since 2005 **African Vision Malawi** has been helping children and vulnerable people, in a 400km^2 area with approximately 60,000 population. It is 30km from Lilongwe just North West of Kamuzu International Airport.

Our vision is to see a **"healthy, educated and self-sufficient community in Malawi"**. We run outreach programmes in our area focused on Education, Health and Sustainable Agriculture.

Sam's Village was built to provide our community with vocational and life skills training and they pay back in areas such as making OVC uniforms. It provides much needed skills within the community.

Residential training started in Spring 2018. The activities were supported through the Skills and Technical Education Programme (STEP), an initiative funded by the European Union and partially implemented by UNESCO.

We are now offering the facility to other organisations at subsidised rates. The money raised will be put back into the running of Sam's Village and provide further training to ultra-poor and marginalised people, empowering orphans, women, disabled people or HIV+.

Early Childhood Development training

Carpentry training
